FAILING THE STRAVA MARCH ENDURANCE CHALLENGE 2023

“ *how to beat the challenge - 300 kilometers of jogging in a month*
- Endurance - Luka Jagor - Digital Art
<https://www.luka.jagor.info/Endurance.html>

I'm broken how it hurts me - I failed the Strava March Endurance Challenge 2023. I got a physical injury twenty days ago, I still don't know how severe it is. The recreational activity I'm interested in shouldn't be so hard to get myself injured. But I won't quit - here is my entire Strava activity log for difficult March 2023:

PLEASE USE MORE OF CLEANER, GOVERNMENTAL MEANS OF TRANSPORT TO **S A V E** THE ENVIRONMENT

Although they are heavy polluters, trucks transport 77 percent of cargo in the EU. People are very sick, but the roads are much better. Motorized transport: a train or boat is the best.

MY VIEW OF APPLE 🍎 🍏 PRODUCTS

Homemade Apple Juice, Apple Pie, and Apple Strudel are my favorites that I make myself (except strudel dough). I'll perfect it in the future, to make my cooking blog funny 🤪 as possible. I'll be redecorating the kitchen with infinity pattern wallpapers I've designed, they've just got outta press. Check out - this is one of my favorites - [Luka Jagor - Digital Art - Pattern](#)

MY VEGAN RECIPES - RICH COCOA CAKE

Dough

1 and a half cups of flour

3 large spoons of cocoa

1 cup of sugar

1 baking powder

1 vanilla sugar

half a teaspoon of salt

5 tablespoons of oil

1 cup of warm water

Cake filling

Apricot jam

Vegan Chocolate Hazelnut Spread

Coconut flour

Turn on the oven at 220 degrees Celsius (425 degrees F). Start making the cake by starting with the dough. Add and mix the dry ingredients, then add oil and water, and mix again (there is no need for the household stand mixer). Lightly oil the bottom of the pan, fill it and place it in the oven. Bake for 30-40 minutes.

Take out the dough from the oven, and wait a bit to cool down. Then, cut it in half, add Vegan Chocolate Hazelnut Spread in the middle, and rejoin. The best thing to do next is to add apricot jam on top, then just finish it with a sprinkling of coconut flour.

NEW USER EXPERIENCE DESIGN FROM MY VIEWPOINT

As I've stated before my little obsession is with torus regarding interaction design. Torus seems like it has it all - it fits in the palm of your hand and also has many adaptive usability in nature. You could have hands full with torus, it better fits than cell phone, working with future holographic technology in a way that is unimaginable.

MY WAY OF DEALING WITH DEPRESSION - UPDATED

The best to do is, maybe not so much socializing, but rather connecting with Gaia.

My View of Connecting With Gaia

There are other ways to connect with Gaia besides old-fashioned smoking and spitting. Connecting with Gaia gives a solid sense of living in ...

 jagor.info

Long (2-3 hours) walking adventures are a great way to start dealing with depression. It helps you sleep better. Later on, when your physical activity boosts, you could even go for a hike.

You better try caramel milk as well - the ultimate fix for depression.

MY VIEW OF SEARCH ENGINE OPTIMIZATION

Trivial search engine optimization has so much potential for Online Social Networks, where URL addresses would be short and friendly to users. Media descriptors are also important, artificial or human, for tagging metatags. A different path is with the chatbot software enhancement. I always like to emphasize open society, cheap technology, and accessibility where www technology has no real competitor, and where search engines play an important role.

TRICKS AND TIPS IN HOUSECARE - STRETCH YOUR LEGS AND COME TO THE GARDEN

Generally, less than 100 square meters is the size of gardens most of us have. Grassland garden areas are even less. Sometimes they say it's not good to cut the grass often because it emits greenhouse gasses. Also, I would like to share my experience with cutting grass, it's best without using the noisy electric motor, especially on smallest grasslands (10 meters) to keep it from irritation.

6 YEARS OF FACEAPP

“ *FaceApp Technology Limited Initial release December 31, 2016; 6 years ago*
- from Wikipedia, the free Encyclopedia <https://en.wikipedia.org/wiki/FaceApp>

FaceApp is the only one I know that the Russians have contributed to the Internet other than the Darknet drug market, and that was also scandalous. It had many General Data Protection Regulation (GDPR) problems, even before GDPR was officially approved.

MY VIEW OF PRODUCTIVITY HACKS

They say that coffee can increase a person's contraction by up to 15 percent, it's the most famous productivity hack, certainly my favorite. Wishful thinkers were saying the price will go up, which it has, really - with stunning inflation. TRICKS AND TIPS IN HOUSECARE - MY VIEW OF ORGANIZING HOME

Declutter your space to make it compact, and easy to maintain by not getting too emotional with stuff. Hopefully, IoT will be operational in all over smart cities so you won't be bothered with e.g. water meters readouts; connect your smart fridge together with Nutrition Apps and local food stores to save time. Never forget emergency protocols and make sure you have all necessary equipment and its functioning well - that's the most important.

I'm not familiar with Feng shui, but I want to believe that - in a way like there is good and bad house humidity, like there is good in everything, except in bad, of course. There is no good in bad, that's 4 sure

WHY ARE INVESTIGATIVE ARTICLES IMPORTANT, AND WHY DO I TRY TO AVOID THEM?

I haven't been here since yesterday, I know that at the end of each of those investigative articles, I would come up that - you know - oh it's nothing. I tend to write superficial about corruption, using general terms. I'm mostly preoccupied with #decodeCulture initiative, having thought experiments (e.g. thinking 🤔) rather than argue with locals.

MY VEGAN RECIPES - SWEET FRITTERS

1 cup of flour

1 vanilla sugar

1 baking powder

a bit of salt

a bit of sugar

1 glass of warm water

Sweet Fritters

Mix flour, baking powder, salt, and sugar, and add water. Mix everything with a spoon until the ingredients are combined. After frying, finish by sprinkling powdered sugar or cocoa sauce - which you can make yourself.

MY VEGAN RECIPES - APPLE PIE

1 cup semolina

1 cup of flour

1 cup of coconut flour

1 cup of sugar

1 baking powder

1 vanilla sugar

7 large apples

Apple Pie

Mix all the dry ingredients. Oil the bottom of the baking dish. Use your hands to spread the dry mixture on the bottom. Sprinkle a layer of grated apples over the dry mixture. Repeat the sprinkling of the dry mixture, and continue with grated apples. Finish when you use up the mixtures. Bake for 30-40 minutes in preheated oven at 220 degrees Celsius (425 degrees F).

MY VIEW OF THE 25 HOURS DAY HERE ON EARTH

I like the idea  I would have more time to work on my hobbies and spend more time with loved ones.

It would mean root changes need to get done, those who advocate daytime savings time would be thrilled, I suppose. Hoping leap year helper would go away, with it Olympic games infrastructure, entire sports snobs, and their schemes, scams - altogether. MY GARDENING HOBBY

I kept roses tall and unnurtured, they are getting bigger and bigger every day, spreading in all directions. They are healthy. I dream of 'organic' growth, if it is possible, a new stem from the root, or something very close to the ground. Even my irises are very tall this year, and it's been less than 12 months since I've replanted them from a nearby location. Lamprocapnos are up and blooming, I try not to poke around them. I like the ground covered with herbs, and not bare - as some arrange garden flowers. So what if there are some weeds? - We need to get out of the routine, let it grow, to get out of routine in all areas of life, however it shouldn't look too wild.

MY INTERCONTINENTAL INTERVIEW WITH MBAYE, AN AFRICAN ACQUAINTANCE

Mbaye is my new African friend I just met. He comes from the Gambia, a beautiful ❤️ coastal county where I have friends for some time now.

- ***What is this year's bad habit you're trying to break?***

“ *I'm trying to break out of poverty 😊*

- ***What is your 5-year plan? 10-year?***

“ *My plan is to write 📝 down my goals, work on my mindset. I need to enhance my skills, and change my limits.*

- ***What's on your reading list this year?***

“ *This year meditations are on my reading list.*

- ***What is your dream job?***

“ *I dream of being a plumber.*

- ***What is your life motto?***

“ *Seeing my friends living good life with their family.*

- ***What life events had the strongest impact on you?***

“ *Life event that had the strongest impact on me was the death of my parents.*

-
- ***What are your family traditions?***

“ *My family tradition is honoring ancestors*

- ***What piece of advice do you value most?***

“ *The piece of advice I value most is how to take care of my siblings.*

- ***Who told it to you?***

“ *My mom.*

ARTISTIC SWIMMING FROM MY PERCEPTION - BIG-5 LEAGUES IN OUTER SPACE

*Although I'm against sports, there must be some recreational activity people could pull through.
Artistic swimming or synchronized swimming looks perfect.*

*Big-5 Leagues ReMake **

There are indications superluminal data transfer could be possible in today's time and space, near zero network latency, is needed. I would have imagined artistic swimming in five distant locations, hooked up with high-quality touchable holographic technology. The participants involved would not feel alone and disconnected from their swimming co-player, whether a person gets projected from e.g. moon or Mars. Gravitational and other habitational specifics would be modulated on the fly.

TOP HOBBIES I PLAN TO DEDICATE MYSELF TO IN THE FUTURE

Other than cooking and gardening, I plan to read more. EPub format appears very tempting, there are plenty of E-book readers supporting it. COOL SOFTWARE COMPARISON - GOOGLE FIT VS THE STRAVA APP

Fitness Software Apps are cool for my total calories expenditure overview. You don't need an extra gadget like a hybrid watch or some other wearables, the best is to save environmental resources.

Google Fit is very nice, it monitors your complete daily activity. Every month it sends a summary to your email. For making the Strava app I need to manually turn on the activity monitor. The Strava app has tons of functionality, it's the best for runners and cycles, with a subscription option - making it first class.

FAST LIFE, COMPETITIVE MARKET, AND CRUEL COMPETITION

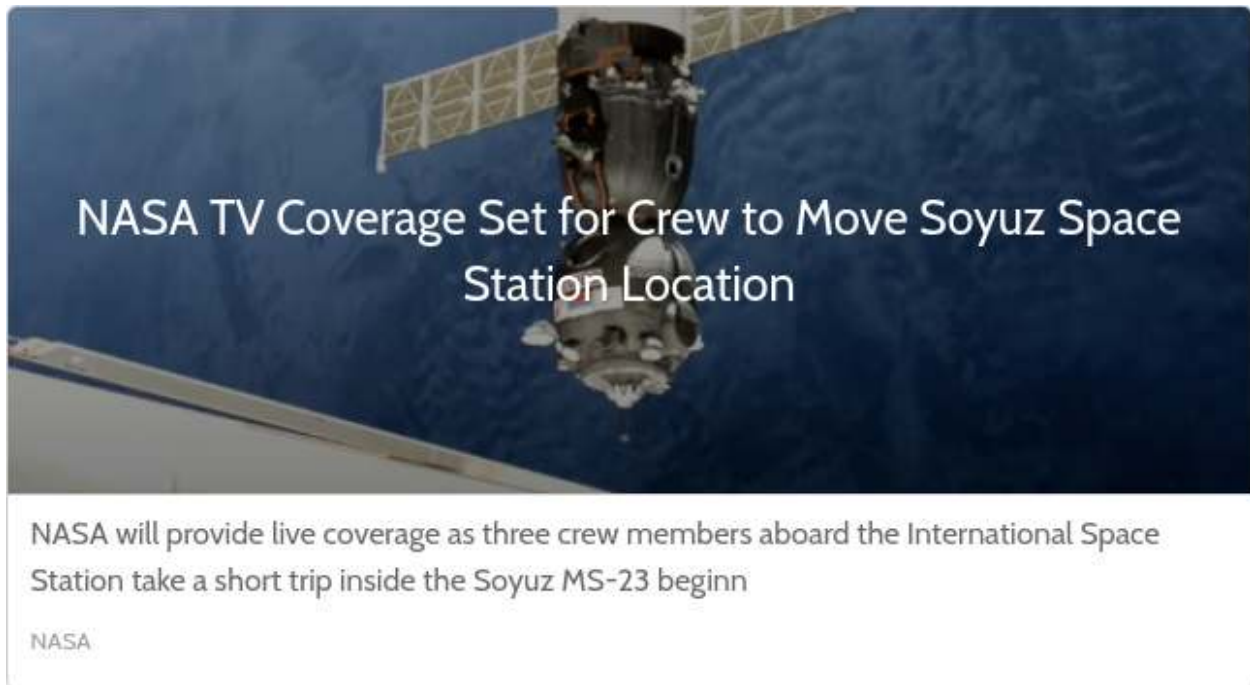

It is often heard that we are not competitive enough, I think it is due to a lack of unity. People often don't have time to talk, and at the same time, they do a lot of stupid things at the expense of good taste. I know we are sportsmanlike, I don't like that. Original file: https://commons.wikimedia.org/wiki/File:CMB_Timeline300_no_WMAP.jpg

Description: Timeline of the universe. A representation of the evolution of the universe over 13.77 billion years. The far left depicts the earliest moment we can now probe, when a period of "inflation" produced a burst of exponential growth in the universe. (Size is depicted by the vertical extent of the grid in this graphic.) For the next several billion years, the expansion of the universe gradually slowed down as the matter in the universe pulled on itself via gravity. More recently, the expansion has begun to speed up again as the repulsive effects of dark energy have come to dominate the expansion of the universe. The afterglow light seen by WMAP was emitted about 375,000 years after inflation and has traversed the universe largely unimpeded since then. The conditions of earlier times are imprinted on this light; it also forms a backlight for later developments of the universe.

Description: *The bottom part of this illustration shows the scale of the universe versus time. Specific events are shown such as the formation of neutral Hydrogen at 380 000 years after the big bang. Prior to this time, the constant interaction between matter (electrons) and light (photons) made the universe opaque. After this time, the photons we now call the CMB started streaming freely. The fluctuations (differences from place to place) in the matter distribution left their imprint on the CMB photons. The density waves appear as temperature and "E-mode" polarization. The gravitational waves leave a characteristic signature in the CMB polarization: the "B-modes". Both density and gravitational waves come from quantum fluctuations which have been magnified by inflation to be present at the time when the CMB photons were emitted.*

QUESTIONS DOWNSIDE

They say nowadays that everything has a reason, that we should never stop asking questions. Also, they say that we should know how to format questions, let alone suggestive types, or 'Five Ws' trivial types. So, read on and you will find out the question types from blogger's perspective: intro, informative, double check questions... There is much more data you could retrieve, but I warn that information stuffiness is reducing creativity.

MY VIEW OF AMATEUR ASTRONAUTS

It would be easy and exciting to get to the moon with the jetpack. Imagine it like paragliding, only much faster. There is almost no friction, and the great interest of physicists today involves the study of 'nothing'. To be honest I'm quite surprised there are no attempts by astronomy enthusiasts, those amateur astronauts, who have a much bigger budget than I.

MY VIEW OF ENGINEERED SOLAR SYSTEM

I heard and read many fuzzy stories about how we should make industry in outer space, and how we could make use of Mercury material. Further on, how the space elevator is technologically available today, how it slows down earth rotation, and how we should 'prolong' day by setting up a 25-hour day counter.

My view of engineered Solar System is a Transformer-like metamorphoses - reshaping moons or even entire planets like raw Mercury, from sphere shape to nice engineered habitable construction. There is so much material and I think it's very important not to take it away from the original location. We should always realize objects in space are synced and one should work on their adaptation on the spot, so that alignment is not disturbed.

The atmosphere changes Sun's appearance, and a depressive day in #Mars that looks like long-lasting dusk needs to be modulated. Chemicals that will provide additional 🌞 light, but won't disturb clean air will be the best 😊 ⚙️ 🎨 🌞

DIY MILK CARTON FLOWERPOTS FOR BALCONY GARDEN - TRICKS AND TIPS IN HOUSECARE - UPDATED

I mostly used 2 liter packs of milk carton boxes to set up a horizontal garden on the balcony. I have determined four basic types by height - the shortest, medium short, medium tall, and tallest. Then I started decorating them by grouping them into a single object.

Cut off their top, make drainage holes at the bottom, tie, and fill with soil.

Sow or plant the desired herbs and flowers.

I've added pics of flowers in the balcony garden because they are blooming - 'post festum' 😊

WRITING ABOUT WHAT I COULDN'T LIVE WITHOUT

I think most definitely I couldn't live without air. Air is very important to me because my body cells need oxygen that's coming out of the air. But maybe sometimes it's good staying outta air - whenever I have hiccups - I stop 🛑 breathing for a while to disrupt the hiccups interval - it worked for me almost every time.

Funny, when I was younger staying outta breath longer than 60 seconds was a big deal, people were telling me. Nowadays people stay outta breath for a long time, and there are even some tribes that are experts in that field.

*Another thing that's bugging me is knowing how life is fragile, and as I read in the article, if Earth would lose oxygen only for minutes, all concrete compounds would break apart. Silly 😏🤔😂😂
Oxygen is essential for concrete.*

All in all, the air should be nice and healthy, I'm very happy for stopping smoking 🚭

MY VIEW OF CREATING A CONTEST - LOOKING BACK AT MY "GOLDEN PIRANHA AWARD"

*I can say I'm very satisfied with my "Golden Piranha Award" Contest, although it was held only once.
There were several categories depending on the field of study, covering a wide variety of interests.
Maybe next time...*
